for you and your patient**

## What are the advantages of L-Mesitran ?

### ✓ Fights all wound bacteria, including antibiotic-resistant bacteria

Thanks to L-Mesitran wounds will after treatment be free of all bacteria, including MRSA and VRE bacteria. As a result, wounds heal fast and successfully.

### ✓ Safe usage without side effects

No side effects, no contra-indications, no restrictions are known related to usage. No allergic reactions or delays in wound healing. Safe, reliable and extensively tested. Can also be used as a preventive antibacterial ointment.

### ✓ Certainty about effectiveness

Numerous studies have proven the effectiveness. The speed of the antibacterial effect and healing is also important. Research among 104 patients with burns that were treated with honey and Silver sulphadiazine, has shown that 91% of the wounds treated with honey was sterile after 7 days and that 87% had fully healed after 15 days. From the Silver sulphadiazine group only 7% of the wounds was sterile after 7 days and 10% had healed after 15 days.<sup>(ref 9)</sup>

### ✓ Applicable for all wounds

L-Mesitran can be used for a broad range of indications and all phases of wound healing. The ointment can also easily reach and clean the wound bottom of deep wounds, such as decubitus, ulcers and fistula and can provide tissue healing.

### ✓ Ease of use

Only a very small dose of the ointment is needed for effective treatment. A thin layer, applied on gauze or plaster, is sufficient. Changing the dressing once a day or once every two days will be sufficient.

### ✓ Cost-effective

The ointment is cost-effective due to the small dose needed for use and the low price.

### ✓ Can be combined with all types of wound dressings

L-Mesitran combines well with all wound dressings, such as gauze or non-woven compresses, band-aids, foam bandages and alginates and therefore fits easily in any wound protocol.

#### • Klinion HG Compres

- (gauze compress)
- Klinion NW Compres (non-woven compress)
  - Kliniplast Border (Band-aid)

(hydrocolloid)

- Lyof foam (foam bandage)
- Kliniderm Hydro

- Kliniderm Alginate (alginate)
